Allowable Subject Matter

1. Claims 1-48 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's arguments, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. Skopp et al., US Pat. No. 6,256,739, in view of Damico et al., US Pat. No. 5,819,285, teach the invention substantially as claimed. Skopp-Damico teach a system and method for preventing access to a document in a server wherein the system establishes a list of allowable sources from which a request to access said document can originate (See Skopp, col. 8, line 19 – col. 9, line 27 and Damico, col. 7, line 44 – col. 8, line 14).

However, the prior art of record fails to teach or suggest individually or in combination a system wherein the system establishes a list of allowable source documents from which a request to access said document can originate. The Examiner finds the applicant's arguments on page 13 – page 15 of the arguments filed June 28, 2004 to be persuasive. The applicant argued in substance that the prior art of record does not teach a system wherein a list of allowable source documents is used to prevent access, as opposed to the prior art user specific access.

3. It is noted that the affidavit filed on December 31, 2003 and June 28, 2004 under 37 CFR 1.131 has not been considered on its merit. The indication of allowable subject

matter set forth above, renders the affidavit moot.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
